DETAILED ACTION

Election/Restrictions

1. Group I Claims 1-3, and 6 are, drawn to "**light controlling display elements**", classified in class 345, subclass 84.

Group II. Claims 4,5 and 7 are, drawn to "**memory**", classified in class 345, subclass 530.

Group III. Claim 8 is, drawn to "**power supply**", classified in class 345, subclass 211.

Inventions Group I and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I has a separate utility such as means of comparing address, extract a display setting, generating a sequence of display settings etc. The subcombination has separate utility such as data storage, a non-volatile section of memory.

Inventions Group I and group III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other

combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I has a separate utility such as means of comparing address, extracting a display setting, generating a sequence of display settings etc The subcombination has separate utility such as an array support member configured with power and ground, a controller operatively coupled to the power, the plurality of display elements operatively connected to the power and ground.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
